# **SECTION 4: First aid measures**

# 4.1. Description of first aid measures

#### **General information**

In the case of accident: Contact a doctor or casualty department – take the label or this safety data sheet. The doctor can contact The National Poisons Information Service (dial 111, 24 h service).

Contact a doctor if in doubt about the injured person's condition or if the symptoms persist. Never give an unconscious person water or other drink.

# Inhalation

Bring the person into fresh air and stay with him/her.

#### **Skin contact**

Immediately remove contaminated clothing and shoes. Ensure that skin, which has been exposed to the material, is washed thoroughly with soap and water. Skin cleanser can be used. DO NOT use solvents or thinners.

#### Eye contact

Remove contact lenses. Flush eyes immediately with plenty of water or isotonic water (20-30°C) for at least 15 minutes and continue until irritation stops. Make sure to flush under the upper and lower eyelids. If irritation continues, contact a doctor. Continue flushing during transport.

#### Ingestion

Provide plenty of water for the person to drink and stay with him/her. In case of malaise, seek medical advice immediately and bring the safety data sheet or label from the product. Do not induce vomiting, unless recommended by the doctor. Have the victim lean forward with head down to avoid inhalation of- or choking on vomited material.

#### **Burns**

#### Not applicable

#### 4.2. Most important symptoms and effects, both acute and delayed

Irritation effects: This product contains substances, which may cause irritation upon exposure to skin, eyes or lungs. Exposure may result in an increased absorption potential of other hazardous substances at the area of exposure.

#### 4.3. Indication of any immediate medical attention and special treatment needed

IF exposed or concerned: Get immediate medical advice/attention.

#### Information to medics

Bring this safety data sheet.

## **SECTION 5: Firefighting measures**

#### 5.1. Extinguishing media

Recommended: alcohol-resistant foam, carbonic acid, powder, water mist. Waterjets should not be used, since they can spread the fire.

#### 5.2. Special hazards arising from the substance or mixture

If the product is exposed to high temperatures, e.g. in the event of fire, dangerous catabolic substances are produced. These are: Carbon oxides. Some metal oxides. Fire will result in dense black smoke. Exposure to combustion products may harm your health. Fire fighters should wear appropriate protection equipment. Closed containers, which are exposed to fire, should be cooled with water. Do not allow fire-extinguishing water to enter the sewage system and nearby surface waters.

# 5.3. Advice for firefighters

No specific requirements.

#### **SECTION 6: Accidental release measures**

- 6.1. Personal precautions, protective equipment and emergency procedures No specific requirements.
- 6.2. Environmental precautions No specific requirements.
- 6.3. Methods and material for containment and cleaning up

Use sand, sawdust, earth, vermiculite, diatomaceous earth to contain and collect non-combustible absorbent materials and place in container for disposal, according to local regulations. To the extent possible cleaning is performed with normal cleaning agents. Avoid use of solvents.

#### 6.4. Reference to other sections

See section on "Disposal considerations" in regard of handling of waste. See section on 'Exposure controls/personal protection' for protective measures.

#### **SECTION 7: Handling and storage**

#### 7.1. Precautions for safe handling

Smoking, storage of tobacco, consumption and storage of food or liquids are not allowed in the workrooms. See section on 'Exposure controls/personal protection' for information on personal protection.

#### 7.2. Conditions for safe storage, including any incompatibilities

Always store in containers of the same material as the original container. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

# Storage temperature

No data available.

# 7.3. Specific end use(s)

This product should only be used for applications quoted in section 1.2

#### **SECTION 8: Exposure controls/personal protection**

#### 8.1. Control parameters

## OEL

No substances are listed in The Control of Substances Hazardous to Health Regulations with an occupational exposure limit. **DNEL / PNEC** 

DNEL (Sodium silicate): 5.61 mg/m3 Exposure: Inhalation Duration of Exposure: Long term – Systemic effects - Workers

DNEL (Sodium silicate): 1.59 mg/kg bw/day Exposure: Dermal Duration of Exposure: Long term – Systemic effects - Workers

DNEL (Sodium silicate): 0.80 mg/kg bw/day Exposure: Oral Duration of Exposure: Long term – Systemic effects - General population

DNEL (Sodium silicate): 1,38 mg/m3 Exposure: Inhalation Duration of Exposure: Long term – Systemic effects - General population

DNEL (Sodium silicate): 0.80 mg/kg bw/da Exposure: Dermal Duration of Exposure: Long term – Systemic effects - General population

DNEL (Sodium carbonate peroxide): 12,8 mg/cm2 Exposure: Dermal Duration of Exposure: Short term – Local effects - Workers

DNEL (Sodium carbonate peroxide): 5 mg/m3 Exposure: Inhalation Duration of Exposure: Long term – Local effects - Workers

DNEL (Sodium carbonate peroxide): 6,4 mg/cm2 Exposure: Dermal Duration of Exposure: Short term – Local effects - General population

PNEC (Sodium silicate): 7,5 mg/l Exposure: Freshwater

PNEC (Sodium silicate): 1 mg/l Exposure: Marine water

PNEC (Sodium silicate): 348 mg/l

# Exposure: Sewage Treatment Plant

# 8.2. Exposure controls

Control is unnecessary if the product is used as intended.

# General recommendations

Observe general occupational hygiene standards.

# Exposure scenarios

In the event exposure scenarios are appended to the safety data sheet, the operational conditions and risk management measures in these shall be complied with.

# **Exposure** limits

Occupational exposure limits have not been defined for the substances in this product.

# Appropriate technical measures

Apply standard precautions during use of the product. Avoid inhalation of gas or dust.

#### **Hygiene measures**

In between use of the product and at the end of the working day all exposed areas of the body must be washed thoroughly. Always wash hands, forearms and face.

# Measures to avoid environmental exposure

No specific requirements.

Individual protection measures, such as personal protective equipment

#### Generally

Use only CE marked protective equipment.

Respiratory Equipment

No specific requirements.

# Skin protection

Dedicated work clothing should be worn.

# Hand protection

Wear protective gloves. The specific work situation is unknown. Contact the suppliers of the gloves for further advice regarding the appropriate glove type. Please note that elastic gloves stretch when used. The thickness of the gloves, and therefore their penetration time, will be reduced. Moreover, the temperature of the glove in use is about 35°C, while the standard test, EN 374-3, is done at 23°C. The penetration time is therefore reduced by a factor of 3.

#### Eye protection

Wear safety glasses with side shields.
